

Join us at our virtual open house session.

WHAT IS THE EGLINTON CROSTOWN WEST EXTENSION?

The Eglinton Crosstown West Extension will bring the Crosstown LRT further west, creating a continuous rapid transit line along Eglinton Avenue, from the east end of Toronto into Mississauga. Join us on June 8 for a virtual open house for the latest on the Eglinton Crosstown West Extension and how the project is moving forward.

VIRTUAL OPEN HOUSE
TUESDAY, JUNE 8 at 6:30 PM
To register: [Metrolinx.com/EglintonWest](https://www.metrolinx.com/EglintonWest)

At this event, you can learn more about the elevated guideway, how we're keeping you moving during construction, and next steps for the project. Please sign up for our e-newsletter at the link above for latest project information and to learn more about upcoming monthly virtual open houses. Upcoming discussion topics include traffic management, tunnelling work and early station designs for public feedback.

If you are unable to attend, you can review the material and watch the recorded videos of live events at [MetrolinxEngage.com/ECWE-live-meetings](https://www.metrolinx.com/ECWE-live-meetings).

PROJECT BACKGROUND

The Eglinton Crosstown West Extension will extend the Eglinton Crosstown LRT another 9.2 kilometres from the future Mount Dennis station to Renforth Drive. It will create a continuous line of rapid transit that runs all the way from Scarborough to Mississauga through the middle of Toronto. Future riders will be able to connect to GO Transit and UP Express rail services, local bus services, and the Line 1 subway along the way. As we move towards the 2030-31 completion date, we'll be working hand in hand with the community and our municipal partners, ensuring they are involved and informed every step of the way.

Metrolinx is also collaborating with the Greater Toronto Airports Authority and our municipal partners to explore a potential connection to Pearson International Airport, opening up even more travel possibilities for airport customers and local workers.

CONSTRUCTION UPDATES

West End Connectors has been identified as the team who will finalize the design and build the tunneling contract. They are currently mobilizing to prepare the launch shaft at Renforth Drive and Commerce Boulevard, where the two tunnel boring machines are anticipated to launch in Spring 2022!
